Unused data rolls over on all plans. Just dial *100# to activate any plan.

WELCOME 4G+

GTT enables rollover data for mobile customers

As competition intensifies between communications service providers (CSPs), increasing customer loyalty is more important than ever. To address this challenge, GTT introduced an innovative new rollover data offering. Under this plan, any unused data is carried forward as long as the subscriber stays with GTT.

Manage Data Quotas

By leveraging Sandvine's Quota Manager, GTT accurately tracks a wide selection of prepaid and postpaid data quotas.

To enable data rollover, an operator simply needs to set-up the appropriate configurations within Quota Manager. The Sandvine platform takes care of the rest.

Let the Good Times Roll

Rollover data is a great way to build loyalty with customers. Switching to a new provider becomes much less enticing if a subscriber has to give up his or her unused data bank.

By combining rollover data and innovative offerings like free Facebook and WhatsApp, it's easy to see why customers love GTT.

Innovation made Easy

"Sandvine has made it easy for us to rapidly enable innovative, free, and commercial subscriber services that will help us meet our goal of fostering a better quality of life for all Guyanese."

- Gert Post
Chief Commercial Officer

About GTT

Established in 1990, GTT is the leading telecommunications provider in Guyana.

With a subscriber base of over 280,000, GTT is delivering a strong digital experience to Guyana.
