

Webbing: Manageable Mobile Roaming for Global Businesses

Webbing enables disruptive data roaming in more than 170 countries

[Webbing's Spot global hotspot](#) and accompanying Management Platform deliver a cost-effective and manageable mobile roaming solution for global businesses. With Webbing, enterprises can drastically reduce their overall spend on telecom services for international travelers while delivering state-of-the-art 4G LTE performance and security.

Sandvine's Virtual Series plays a key role in providing data and policy control to the [Webbing Management Platform](#), which gives businesses real-time visibility into travelers' usage via a cloud-based mobile device management platform, and lets them implement management policies to control costs and ensure appropriate usage.

Behind-the-Scenes

Webbing has deployed the Sandvine Virtual Series – the completely virtualized version of the Sandvine platform – in multiple datacenters around the world.

The flexibility afforded by this virtualized solution means Webbing can quickly and cost-effectively scale up deployments as required.

Know Your Customers

In 2015, Webbing used Sandvine's business intelligence products to conduct an analysis of the data usage habits of their customer base.

[The results](#) revealed a number of interesting details about business roaming, and allowed Webbing to create new products and services.

Real Versatility

"The flexibility of the Sandvine Virtual Series also allowed us to demo, trial and deploy our desired solution 100% remotely. We are excited about how Sandvine's Virtual Series will easily scale with the future growth of our customer base and their bandwidth requirements."
