

# iQ52600 Platform

High performance, 2RU network intelligence and policy enforcement platform

The iQ52600 platform gathers network intelligence to provide performance insights as well as enforces fine grained policy to enable network operators to take actions necessary to improve the quality of experience (QoE) for users.

The iQ52600 platform is a high performance 2RU appliance offering up to 540Gbps of throughput, accessible by 12 x 100GE networking ports. The iQ52600 platform can be configured to support a broad range of use cases enabled by Sandvine across multiple solution areas.

## KEY CAPABILITIES

Sandvine's iQ52600 with ActiveLogic, enables a full suite of network intelligence and policy enforcement capabilities, including:

- Traffic identification and classification
- Congestion management
- Traffic prioritization
- Application-layer traffic management
- Statistics collection and streaming
- Application delivery networking via advanced traffic steering

## ABOUT SANDVINE

Sandvine's cloud-based Application and Network Intelligence portfolio helps customers deliver high quality, optimized experiences to consumers and enterprises. Customers use our solutions to analyze, optimize, and monetize application experiences using contextual machine learning-based insights and real-time actions. Market-leading classification of more than 95% of traffic across mobile and fixed networks by user, application, device, and location creates uniquely rich, real-time data that significantly enhances interactions between users and applications and drives revenues.
