

PacketLogic™ Base Operations

This remote course is an Introduction to PacketLogic Operations & Maintenance

COURSE OVERVIEW

Intended for operations personnel, this course is designed to meet the needs of network providers who are operating Sandvine's PacketLogic products. This remotely-delivered, instructor-led course includes slides, discussion, and live demonstrations.

Objectives

- Familiarize participants with PacketLogic elements that exist in the network
- Understand the basics of Managing & Monitoring these elements

Course Duration

Five hours

Course Outline

What's in my network?

- What is the PacketLogic Real-Time Enforcement (PRE)?
- What is the PacketLogic Intelligence Center (PIC)?
- What is the PacketLogic Subscriber Manager (PSM)?
- For each of the elements above, what do they do?
- How are the PRE, PIC, and PSM interconnected?

Managing & Monitoring My System

- Using PacketLogic Client to Manage Elements
- Connecting to Elements via ssh
- Monitoring real-time traffic
- Introduction to PacketLogic TUI and CLI
- Collecting and viewing Statistics
- Monitoring and Troubleshooting PacketLogic
- Administering & Maintaining PacketLogic
